Projects

QuickGigs - Freelance Marketplace

Tech Stack: Django, Python, PostgreSQL, Stripe API

Full-stack job board platform connecting employers with freelancers. Built complete user authentication system, profile management, CRUD operations for gig postings, and integrated Stripe for premium membership payments. Capstone project for Level 5 diploma.

 Live Demo <https://quickgigs-django.onrender.com>

Music Explorer

Tech Stack: JavaScript, HTML, CSS, External APIs

Interactive music discovery application with real-time search and preview functionality. Integrated with music APIs to provide seamless browsing and playback. Features dynamic content loading and responsive design.

 Live Demo <https://aransys.github.io/Project-2>

Worcester Laundry Services

Tech Stack: JavaScript, HTML, CSS

Professional landing page with service showcases, dynamic pricing tables, and interactive contact forms. Built with modern CSS animations, accessibility features, and mobile-first responsive design.
